MARKET COMMENTARY

Global equities finished the first quarter strong, as encouraging economic data and signs central banks are preparing to loosen monetary policy boosted investors' risk appetite. The MSCI World Index rose 9.01%, with North America, Asia Pacific and Europe up 10.14%, 6.84% and 5.39%, respectively. The S&P 500 Index gained 10.56%, its best start to a year since 2019 on hopes the Federal Reserve will cut rates in 2024. The 10-year U.S. Treasury yield increased to 4.20%, from 3.88%, at the end of December, as markets repriced their rate-cut expectations. West Texas Intermediate Crude Oil finished the quarter at \$85.17, up from \$71.65, amid signs of improving demand, geopolitical tensions, and sustained OPEC production cuts. The Bloomberg Commodity Index rose 2.19%.

Performance

The sector declined during the period amid concerns around elevated interest rates.

Top Contributors:

- Water & Waste Infrastructure (infrastructure-like). Waste management companies continued to rally, following strong performance in 2023.
- Water & Waste Infrastructure (broader value chain). A position in a water technology company outperformed during the period.
- Clean Technology. A company focused on the electrification value chain outperformed.

Quarterly Report

All data as of March 31, 2024

Brookfield Global Renewables and Sustainable Infrastructure UCITS Fund

Class E: BRRUEA

Top Detractors:

- Renewable Power & Infrastructure (infrastructure-like). Renewable power producers across the globe were negatively impacted during the period by rising interest rates.
- Renewable Power & Infrastructure – broader value chain. Manufacturers of wind turbines and solar panels declined.

Portfolio Positioning and Outlook

Stabilizing inflation, subsiding supply chain headwinds, and a normalizing interest rate environment set the stage for an improving renewable power investing environment in 2024. Coupled with this better fundamental backdrop, we believe today's attractive valuations offer a very enticing entry point into the asset class.

We expect growing positive sentiment toward listed renewables and sustainable infrastructure amid several specific tailwinds we see supporting the group this year and beyond: declining equipment costs, improving costs of capital and continued demand for renewable deployments.

We continue to highlight the importance of diversity within the renewables and sustainable infrastructure universe. Beyond "pure-play" renewables companies like power generators, wind turbines and solar panels, the universe includes waste management companies tied to the concept of a circular economy. We believe these companies have shown their ability to provide diversification to a renewables portfolio.

We made the following position changes during the period:

- Initiated a position in a German electric utility, given what we view to be a favorable trajectory for company's fundamentals. We see potential for the regulatory environment to improve, which could increase investments in grid spending. Conversely, we reduced exposure to several power generators in the U.K. and Europe.
- Initiated a position in a Northeastern U.S. utility given what we believe was an attractive market value dislocation, coupled with potential company-specific catalysts around offshore wind auctions and asset sales. Conversely, we decreased exposure to a Midwest U.S. utility, based on our view of a better risk/reward opportunity.
- Added a position to a company focused on providing solar tracker and software solutions to utility-scale power projects. We believe fundamentals are supported by lower installation costs and projections for installations in the coming years. Conversely, we exited a company focused on the U.S. solar residential market, based on deteriorating demand fundamentals, which we believe will take time to rebound.
- Initiated a position in a manufacturer of commercial and residential heating, ventilation, and air conditioning (HVAC) systems. We see positive fundamental drivers for the business, particularly around commercial solutions and additional tailwinds related to growing data center demand.

A fund's investment objectives, risks, changes and expenses must be considered carefully before investing. The prospectus contains this and other important information about the investment company, and it may be obtained by calling +1 (212) 549-8380 or visiting www.brookfield.com. Please read the prospectus carefully before investing. Investing in the Fund involves risk. Principal loss is possible. There can be no assurance that the Fund will achieve its investment objective.

The Fund invests in renewable and sustainable infrastructure companies, which may be subject to a variety of factors that may adversely affect their business, including high interest costs, high leverage, regulation costs, economic slowdown, surplus capacity, increased competition, lack of fuel availability and energy conservation policies. The Fund invests in small and mid-cap companies, which involve additional risks such as limited liquidity and greater volatility. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are magnified in emerging markets. Some securities held may be difficult to sell, particularly during times of market turmoil. If the Fund is forced to sell an illiquid asset to meet redemption, the Fund may be forced to sell at a loss. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Debt securities rated below investment grade are commonly referred to as "junk bonds" and are generally more volatile, less liquid, and considered speculative. Since the Fund will invest more than 25% of its total assets in securities in the Renewables and Sustainable Infrastructure industry, the Fund may be subject to greater volatility than a fund that is more broadly diversified.

The MSCI World Index is a free float-adjusted market capitalization weighted index designed to measure equity market performance of developed markets.

Indexes are not managed and an investor cannot invest directly in an index. Index performance is shown for illustrative purposes only and does not predict or depict the performance of the Fund.

The Brookfield Global Renewables and Sustainable Infrastructure UCITS Fund has, after review by the Belgian Central Agency, met the quality standards for use of the "Towards Sustainability" label. Please see the Fund's permission to use the "Towards Sustainability" label found here. The "Towards Sustainability" label is a quality standard that aspires to increase the level of socially responsible and sustainable financial products, and to mainstream its principles towards traditional financial product. The "Towards Sustainability" initiative wants to help investors looking for more sustainable savings and investment solutions. Also, it wants to encourage financial institutions to offer a diverse and qualitative range of sustainable products. The "Towards Sustainability" label aims to instill trust and reassure potential investors that the financial product is managed with sustainability in mind and is not exposed to very unsustainable practices, without requiring of investors to do a detailed analysis themselves. The label is awarded and administered by the Central Labeling Agency (CLA) of Belgian SRI label developed on the initiative of Febelfin. For more information on the Towards Sustainability initiative and label, please visit www.towardsustainability.be. The Central Labeling Agency (CLA) assumes no responsibility and shall not be liable for the non-compliance with applicable rules and regulations regarding, among others but not limited to, the marketing of financial instruments by a product provider, a financial institution or any other market participant or party who uses the 'Towards Sustainability' label."

The Global Renewables and Sustainable Infrastructure Strategy, including the Fund, was awarded a AA ESG rating from MSCI. This rating is awarded to leaders in adopting ESG investment principles. Each strategy scores a rating on a scale from CCC (laggard) to AAA (leader). The rating is based first on the weighted average score of the holdings of the strategy. MSCI then assess ESG momentum to gain insight into the fund's ESG track record, which is designed to indicate a strategy's exposure to holdings with a positive rating trend or worsening trend year over year. Finally, MSCI reviewing the ESG tail risk to understand the fund's exposure to holdings with worst-of-class ESG Ratings of B and CCC. The rating was published in June 2020 and will be reviewed on an annual basis. ©MSCI Inc. MSCI ESG Research is an independent provider of ESG data, reports and ratings based on published methodologies and available to clients on a subscription basis.

¹ Represents data for Class E since inception. Standard deviation measures the degree to which an investment's return varies from its mean return. Tracking error measures the difference between a portfolio's returns and its benchmark. Sharpe ratio is a measure of the excess return to the risk-free rate (or risk premium) per unit of risk (measured by standard deviation) in an investment asset or a trading strategy.

² PSG, the Fund's investment advisor, has voluntarily agreed to waive all or a portion of its management fees and/or reimburse certain expenses of the Fund to the extent necessary to maintain the Fund's total expense ratio (excluding brokerage commissions and other transactional expenses, interests, taxes and extraordinary expenses, such as litigation; and other expenses not incurred in the ordinary course of the Fund's business) at no more than 1.15% of the Fund's share classes. This fee waiver and expense reimbursement arrangement is voluntary which the Fund's investment advisor may terminate in its sole discretion at any time. Please refer to the Fund's prospectus, supplementary prospectus and Key Investor Information Document (KIID) available at www.brookfield.com for a discussion of any charges that may be applied to an investment in the Fund.

³ This is the maximum figure, the charge may be less than this.

⁴ Source: PSG. Sector and country allocations and asset classes determined by PSG are expressed as a percentage of total investments (by market value) and will vary over time. Cash and Other includes available cash and other receivables and payables of the Fund.
