Brookfield Global Renewables and Sustainable Infrastructure UCITS Fund

US Dollar 'Institutional' Distribution Shares Class F IE00BKY81F10

A sub-fund of Brookfield Investment Funds (UCITS) p.l.c

This Fund is managed by Waystone Management Company (IE) Limited (the "Manager")

Objectives and Investment Policy

- The Brookfield Global Renewables and Sustainable Infrastructure UCITS Fund (the "Fund") seeks total return through the growth of capital and current income.
- The Fund mainly invests in equities (securities that represent an ownership stake in a business).
- The Fund invests primarily in securities of global renewables and sustainable infrastructure companies including, but not limited to wind and solar, other forms of clean power, clean technology, water sustainability and opportunistic transitioning companies. For a more detailed explanation of global renewables and sustainable infrastructure, please refer to the Fund's supplement.
- The Fund may invest in securities issued by U.S. and non-U.S. issuers, including companies in emerging markets around the world. In investment terms, emerging markets are regions of the world that are typically still developing their economies.
- The Fund may invest in derivatives, such as forward currency contracts, options, futures, and swaps which are linked to the rise and fall of other assets.
- Derivatives may be used for investment purposes and for efficient portfolio management such as reducing risk, costs, or generating additional capital or income for the Fund.
- For this share class, the Fund distributes available income on a quarterly basis.
- You can buy and sell shares on most working days in Dublin. Exceptions are more fully described in the prospectus.
- The Fund is actively managed, meaning the Investment Manager has discretion over the composition of the Fund's portfolio, subject to the Fund's stated investment objective and policy. Although the MSCI World Index is used by the Fund for performance comparison purposes only, the Investment Manager's investment decisions will not be influenced by the constituents of the MSCI World Index. Accordingly, the Investment Manager will select the Fund's investments based entirely on its stock selection techniques, irrespective of whether such stocks are components of the MSCI World Index.
- Investment in the Fund may be suitable for investors with a medium to long term investment horizon.
- For full investment objectives and policy details, please refer to the prospectus.

Risk and Reward Profile

◆ Lower risk							Higher risk ◆
◆ Typically lower rewards							Typically higher rewards ◆
1	2	3	4	5	6	7	

- The Fund is classified in the category above due to the nature of the investments which include the risks noted below.
- The indicated risk category may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. The lowest category does not mean 'risk free.'
- The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.
- In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:
 - Investments in equity securities may fall in market value due to adverse market and economic conditions, perceptions regarding the industries in which the Fund invests and the circumstances and performance of particular companies whose securities the Fund holds.
 - Securities of infrastructure companies may be adversely impacted by economic or regulatory occurrences affecting their industries. In addition, technological innovation, changes in the number of end-users and susceptibility to terrorist acts or political actions may affect the operations of the companies in which the Fund invests.
- The Fund will be primarily invested in infrastructure securities, and therefore may be more volatile than a fund which is more broadly diversified.
- Returns which are derived from derivatives may be more volatile than returns derived from the underlying assets. Certain derivatives may result in gains or losses that are greater than the original amount invested.
- Emerging markets may face more political, economic or structural challenges than developed countries.
- Changes in exchange rates may cause the value of investments to decrease or increase.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries, putting your money at greater risk.
- An extended discussion of the risks associated with an investment in the Fund is set out in the prospectus.
