# The Brookfield Infrastructure Advantage

Brookfield is one of the largest infrastructure investors in the world, having managed these assets since 1899. Today, we own and operate some of the world's most critical infrastructure assets-from telecom towers to renewable power facilities to railroads.

We believe Brookfield's advantage in managing infrastructure assets is rooted in three key areas:

## Deep Expertise Across Sectors

**TRANSPORT** 36,300 km of rail operations 10 terminals 2 export facilities

RENEWABLE POWER & TRANSITION 37,000+ MW of renewable power capacity 705 renewable power facilities

UTILITIES 8.4 million electricity & gas connections 71,600 km of electricity transmission lines

MIDSTREAM 21,000 km of transmission pipelines 16 natural gas processing plants

DATA 163,100 telecom towers 140 data centers

Infrastructure is a broad and varied category, and one that is constantly evolving with new technology and needs, but it all plays the key role of underpinning the global economy. Infrastructure investing can bring a range of potential portfolio benefits-including income, potentially hedging inflation, and providing resilience during periods of market turmoil-and infrastructure has historically provided steady performance across a range of macroeconomic environments. These attributes have helped provide investors with attractive, long-term growth.
